Contents of Volume 20

Number 1, October 1993

Publisher's Announcement v

J.A. Hudson and S.J. Mott (New Zealand)
Growth of *Listeria monocytogenes, Aeromonas hydrophila* and *Yersinia enterocolitica* in pâté and a comparison with predictive models 1

Ch. Jacquet, J. Rocourt and A. Reynaud (France)
Study of *Listeria monocytogenes* contamination in a dairy plant and characterization of the strains isolated 13

P.H. In 't Veld, P.S.S. Soentoro and S.H.W. Notermans (The Netherlands)
Properties of *Bacillus cereus* spores in reference materials prepared from artificially contaminated spray dried milk 23

Short Communications

E. Nerbrink and E. Borch (Sweden)
Evaluation of bacterial contamination at separate processing stages in emulsion sausage production 37

L. Valik and F. Görner (Slovakia)
Growth of *Staphylococcus aureus* in pasta in relation to its water activity 45

Announcements 49

Number 2, November 1993

Publisher's Announcement iii

S.A. Ballesteros, J. Chirife and J.P. Bozzini (Argentina)
Specific solute effects on *Staphylococcus aureus* cells subjected to reduced water activity 51

P. Gustavsson and E. Borch (Sweden)
Contamination of beef carcasses by psychrotrophic *Pseudomonas* and *Enterobacteriaceae* at different stages along the processing line 67

P.K.B. Embarek and H.H. Huss (Denmark)
Heat resistance of *Listeria monocytogenes* in vacuum packaged pasteurized fish fillets 85

M.J. Eyles, C.J. Moir and J.A. Davey (Australia)
The effects of modified atmospheres on the growth of psychrotrophic pseudomonads on a surface in a model system 97

Short Communications
J.A. Poulis, M. De Pijper, D.A.A. Mossel and P.Ph.A. Dekkers (The Netherlands)
Assessment of cleaning and disinfection in the food industry with the rapid ATP-bioluminescence technique combined with the tissue fluid contamination test and a conventional microbiological method 109

P.-F. Gobat and T. Jemmi (Switzerland)
Distribution of mesophilic *Aeromonas* species in raw and ready-to-eat fish and meat products in Switzerland 117

Announcements 121

Number 3, November 26, 1993

Publisher's Announcement iii

L. Krusell and N. Skovgaard (Denmark)
Evaluation of a new semi-automated screening method for the detection of *Salmonella* in foods within 24 h 123

U. Schillinger, M.E. Stiles and W.H. Holzapfel (Germany, Canada)
Bacteriocin production by *Carnobacterium piscicola* LV 61 131

B.W. Blais, H.Y. Ong and H. Yamazaki (Canada)
Use of inexpensive O antisera as the detecting antibodies for *Salmonella* antigens in the polymyxin-cloth enzyme immunoassay 149

S.M. Kirov, E.K. Ardestani and L.J. Hayward (Australia)
The growth and expression of virulence factors at refrigeration temperature by *Aeromonas* strains isolated from foods 159

Short Communication
M. Campanini, I. Pedrazzoni, S. Barbuti and P. Baldini (Italy)
Behaviour of *Listeria monocytogenes* during the maturation of naturally and artificially contaminated salami: effect of lactic-acid bacteria starter cultures 169

Announcements 177

Number 4, December 1993

Publisher's Announcement iii

Review

S.M. Kirov (Australia)
The public health significance of *Aeromonas* spp. in foods 179

G. Stoffels, H.-G. Sahl and Á. Gudmundsdóttir (Iceland, Germany)
Carnocin UI49, a potential biopreservative produced by *Carnobacterium piscicola*: large scale purification and activity gainst various Gram-positive bacteria including *Listeria* sp. 199

J.I. Pitt, A.D. Hocking, K. Bhudhasamai, B.F. Miscamble, K.A. Wheeler and P. Tanboon-Ek (Australia, Thailand)
The normal mycoflora of commodities from Thailand. 1. Nuts and oilseeds 211

C. Buchrieser and C.W. Kaspar (USA)
An improved direct viable count for the enumeration of bacteria in milk 227

D.-H. Oh and D.L. Marshall (USA)
Antimicrobial activity of ethanol, glycerol monolaurate or lactic acid against *Listeria monocytogenes* 239

P.C. Houtsma, J.C. De Wit and F.M. Rombouts (The Netherlands)
Minimum inhibitory concentration (MIC) of sodium lactate for pathogens and spoilage organisms occurring in meat products 247

M.C. Varadaraj, N. Devi, N. Keshava and S.P. Manjrekar (India)
Antimicrobial activity of neutralized extracellular culture filtrates of lactic acid bacteria isolated from a cultured Indian milk product ('dahi') 259

Announcements 269
